

Better me. Better we.

**Whole Educators.
Whole Students.
Whole Classrooms.**

re-be Ed is a comprehensive, whole health support system designed to enhance educational experiences with root-level-multifaceted resources, targeted training, and strategic partnerships.

The focus is on revitalizing the well-being, social connections, and productivity of educators, students, and the school-based community for the betterment of all. *Better Me. Better We.*

**When educators and students carry
unseen stress, it shows up in burnout,
behavior, and disengagement.**

Collectively, these challenges constitute a drastic crisis in which students lack adequate literacy, life skills, and wellness support to thrive, while educators are also contending with unaddressed adverse childhood experiences (ACEs), burnout and increasing attrition rates.

ReBe exists to address these dual crises by supporting the **whole educator, the whole student, and the whole classroom** with comprehensive support systems and targeted solutions.

The Crisis:

Educational outcomes are at historic lows and schools are facing overlapping challenges that affect both students and educators.

Classrooms are no longer just academic spaces. They have become **emotional ecosystems** where loneliness, stress, trauma, and fatigue directly impact learning and well-being.

The Statistical Buzz...

Educators' Crisis...

- **68%** of educators report emotional exhaustion (Pew Research Center, 2024)
- **77%** say their job is frequently stressful (Pew Research Center, 2024)
- Teacher retention beyond five years of teaching sits at just **44%**, with districts spending more than \$10,000 per new hire (Education Week, 2018)

Students' Crisis...

- **Three in four** high school students reported experiencing **one or more ACEs**, and one in five experienced four or more ACEs (CDC, 2024)
- **40%** of 4th graders cannot read on grade level (NAEP, 2024) & **70%** of U.S. inmates cannot read above a 4th-grade level (NCES, Ed, 2014)
- **66%** of students have persistent feelings of sadness or hopelessness (CDC, 2023)

**Humanity is longing to be
REstored and RENewed...
It is time for re-be**

re·be Education's Core Components

Educator Development

Student Learning Experiences

Support & Access

- Tools for educator self-reflection to recognize and respond to trauma, ACEs, and personal well-being
- Training on ReBe's Educational Resources for increasing students' overall health and literacy proficiencies
- Professional Learning Communities (PLCs) and EPICS Learning Walks to monitor progress

- EPICS Health Boost (HB) Pathways to strengthen students' Emotional, Physical, Intellectual, Cultural, and Social health
- Experiential Literacy LABS aligned to the Science of Reading and the new literacies: financial, media, and digital literacy
- Integrating Problem-Based Learning (PBL) grade level EPICS units

- Confidential expert access: mentors, coaches, and specialists for educators and students
- Technology tools to extend program impact (e.g., Animation Videos, Apps)
- Actionable insights for leadership through EPICS Learning Walks, data collection and analysis
